THE NORTH WEST REGIONAL HEALTH AUTHORITY

Accounting Policies

30 September 2005

The principal accounting policies adopted in the preparation of these financial statements are set out below:

a Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards and under the historical cost convention. Revenues and expenses are reported on the accrual basis of accounting which recognizes revenues as they become available and measurable. Expenses are recognized as they are incurred and measurable as a result of goods or services and the creation of a legal obligation to pay. During the period 1999 to 2004, the Authority was constrained by the following factors in seeking to prepare its financial statements in accordance with International Financial Reporting Standards:-

- i) Lack of adequate accounting records from predecessor RHA's which were merged into the NWRHA;
- ii) Breakdowns in the Accounting Information Systems (Daceasy and Peachtree) which resulted in loss of data;
- iii) High turnover in Senior Finance Personnel including periods where several senior positions were vacant for extended periods.

b Financial instruments

Financial instruments carried on the balance sheet include cash and bank balances, accounts receivable, other assets, bank indebtedness, accounts payable, long-term debt and other liabilities. and are stated at their approximate fair values determined in accordance with the policy statements disclosed. Unless otherwise noted, it is management's opinion that the RHA is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair values of these financial instruments approximate their carrying values, unless otherwise noted.

c Capital Assets (Property, plant and equipment)

Purchased capital assets are recorded at cost. Contributed capital assets are recorded at fair value at the date of contribution. Assets acquired under capital leases are amortized over the estimated life of the assets or over the lease term, as appropriate. Repairs and maintenance costs are charged to expenses. Betterments which extend the estimated life of an asset are capitalized. When a capital asset no longer contributes to the RHA's ability to provide services, its carrying amount is written down to its residual value.

Amortization of capital assets is calculated on the reducing balance basis, over their estimated useful lives, using the following rates:

c Capital Assets (Property, plant and equipment) cont'd

Freehold Land	-
Freehold Buildings	2%
Leasehold Improvements	10%
Plant and Equipment	20%
Office Furniture	10%
Office Equipment	10%
Computer Equipment	25%
Fixtures and Fittings	10%
Medical Equipment	10%
Motor Vehicles	25%

Land is not depreciated.

Profits or losses on disposals of property, plant and equipment are determined by comparing proceeds with the carrying amount and are included in income.

d Inventories

Inventories are stated at cost determined using the average basis.

e Cash and cash equivalents

Cash and cash equivalents are carried in the balance sheet at cost and comprise cash in hand and, cash at bank. Bank overdrafts are included within borrowings in current liabilities on the balance sheet. For the purposes of the cash flow statement, cash and cash equivalents also include the bank overdrafts.

f Trade receivables

Trade receivables are carried at the original invoiced amounts. No provision was made for the impairment of these receivables.

g Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Trinidad and Tobago dollars at the exchange rates prevailing at the accounting date. Transactions in foreign currencies are recorded at the rate of exchange prevailing at the transaction date. All exchange differences are taken to the income and expenditure statement as incurred.

Accounting Policies (Continued)

h Government grants and Revenue recognition

Grants from the Government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Authority will comply with all attached conditions.

Government grants relating to recurrent expenditure are deferred and are included in non-current liabilities. They are recognized in the income statement over the period necessary to match them with the net expenditure for the year which they are intended to compensate.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities and are credited to the income statement on a straight line basis over the expected lives of the related assets.

i Taxation

The Authority is not subject to corporation tax, by Act Number 5 of 1994.

j Use of Estimates/ Comparatives

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates. Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.
